

# ADVANCED SOCIOMETRY WEEKEND

This 3-day Advanced Sociometry Weekend is designed for those who have extensive experience facilitating sociometry, and who are looking to deepen their skills. Participants will learn specific techniques to help shift the sociometry of a group, couple, family or organization, through interventions and techniques designed to help address issues such as: conflict in group, isolates, cleavages and cliques, transferences, role fatigue and sociostasis.

Together we will create a safe and supportive environment and participants will leave this training with a stronger set of skills to address even the most challenging sociometric dynamics.
