

USING PSYCHODRAMA WITH INDIVIDUALS AND COUPLES

While psychodrama and sociometry are typically used in group settings, they can be incredibly effective when working with individuals and couples as well. In this 3-day weekend workshop, practitioners will learn specific action method techniques to help their clients engage in the therapeutic process, use props and chairs to reach deeper affect, resolve conflict and move towards resolution by bringing issues to life. Through the use of sociometry and psychodrama, clients can be helped to practice new, more effective life skills that can clear away what is no longer working in their lives and move forward in healthier ways.
